Practical 1A

Roll No.: S014	Name: Saqlain Khan
Class: SYIT	Batch: 1
Date of Assignment: 19-06-2026	Date/Time of Submission: 19-06-2026

- Create a simple calculator application using Servlet

HTML Code :-

```
<html>
<head>
<title>Calculator</title>
<meta charset="UTF-8">
<meta name="viewport" content="width=device-width, initialscale=1.0">
</head>
<body>
<form action="Calculator" method="get" name="frm">
Enter Number 1 :
<input name="num1" type="text"/></br>
Enter Number 2 :
<input name="num2" type="text"/></br>
Operator
<select name="Operator">
<option value="Addition">+</option>
<option value="Subtraction">-</option>
<option value="Multiplication">*</option>
<option value="Division">/</option>
```

```
</select>
<input type="reset" value="reset"/>
<input type="Submit" value="submit"/>
</form>
</body>
</html>
```

Servlet Code :-

```
import java.io.IOException;
import java.io.PrintWriter;
import javax.servlet.ServletException;
import javax.servlet.annotation.WebServlet;
import javax.servlet.http.HttpServlet;
import javax.servlet.http.HttpServletRequest;
import javax.servlet.http.HttpServletResponse;
@WebServlet(urlPatterns = {"/Calculator"})
public class Calculator extends HttpServlet {
    protected void processRequest(HttpServletRequest request,
                                   HttpServletResponse response)
        throws ServletException, IOException {
        response.setContentType("text/html;charset=UTF-8");
        PrintWriter out = response.getWriter();
        String num1 = request.getParameter("num1");
        String num2 = request.getParameter("num2");
        String op = request.getParameter("Operator");
        int n1 = Integer.parseInt(num1);
        int n2 = Integer.parseInt(num2);
        if (op.equals("Addition")) {
```

```
        out.println("Addition is : " + (n1 + n2));
    }
    else if (op.equals("Subtraction")) {
        out.println("Subtraction is : " + (n1 - n2));
    }
    else if (op.equals("Multiplication")) {
        out.println("Multiplication is : " + (n1 * n2));
    }
    else if (op.equals("Division")) {
        out.println("Division is : " + (n1 / n2));
    }
    out.println("<br>Calculator");
}
```

@Override

```
protected void doGet(HttpServletRequest request,
                    HttpServletResponse response)
    throws ServletException, IOException {
    processRequest(request, response);
}
```

@Override

```
protected void doPost(HttpServletRequest request,
                    HttpServletResponse response)
    throws ServletException, IOException {
    processRequest(request, response);
}
```

```
@Override  
public String getServletInfo() {  
    return "Short description";  
}  
}
```

Output :-

- Addition

Enter Number 1 : 66
Enter Number 2 : 1
Operator + ▼ reset submit
Addition is : 67
Calculator

- Subtraction

Subtraction is : 65
Calculator

- Multiplication

Multiplication is : 66
Calculator

- Division

Division is : 66
Calculator
